BRING BEAUTY TO YOUR HOME

No matter the reason for re-siding your home, LP® SmartSide® treated engineered wood siding can completely transform your home's appearance with a variety of colors, textures and styles to bring your vision to life.

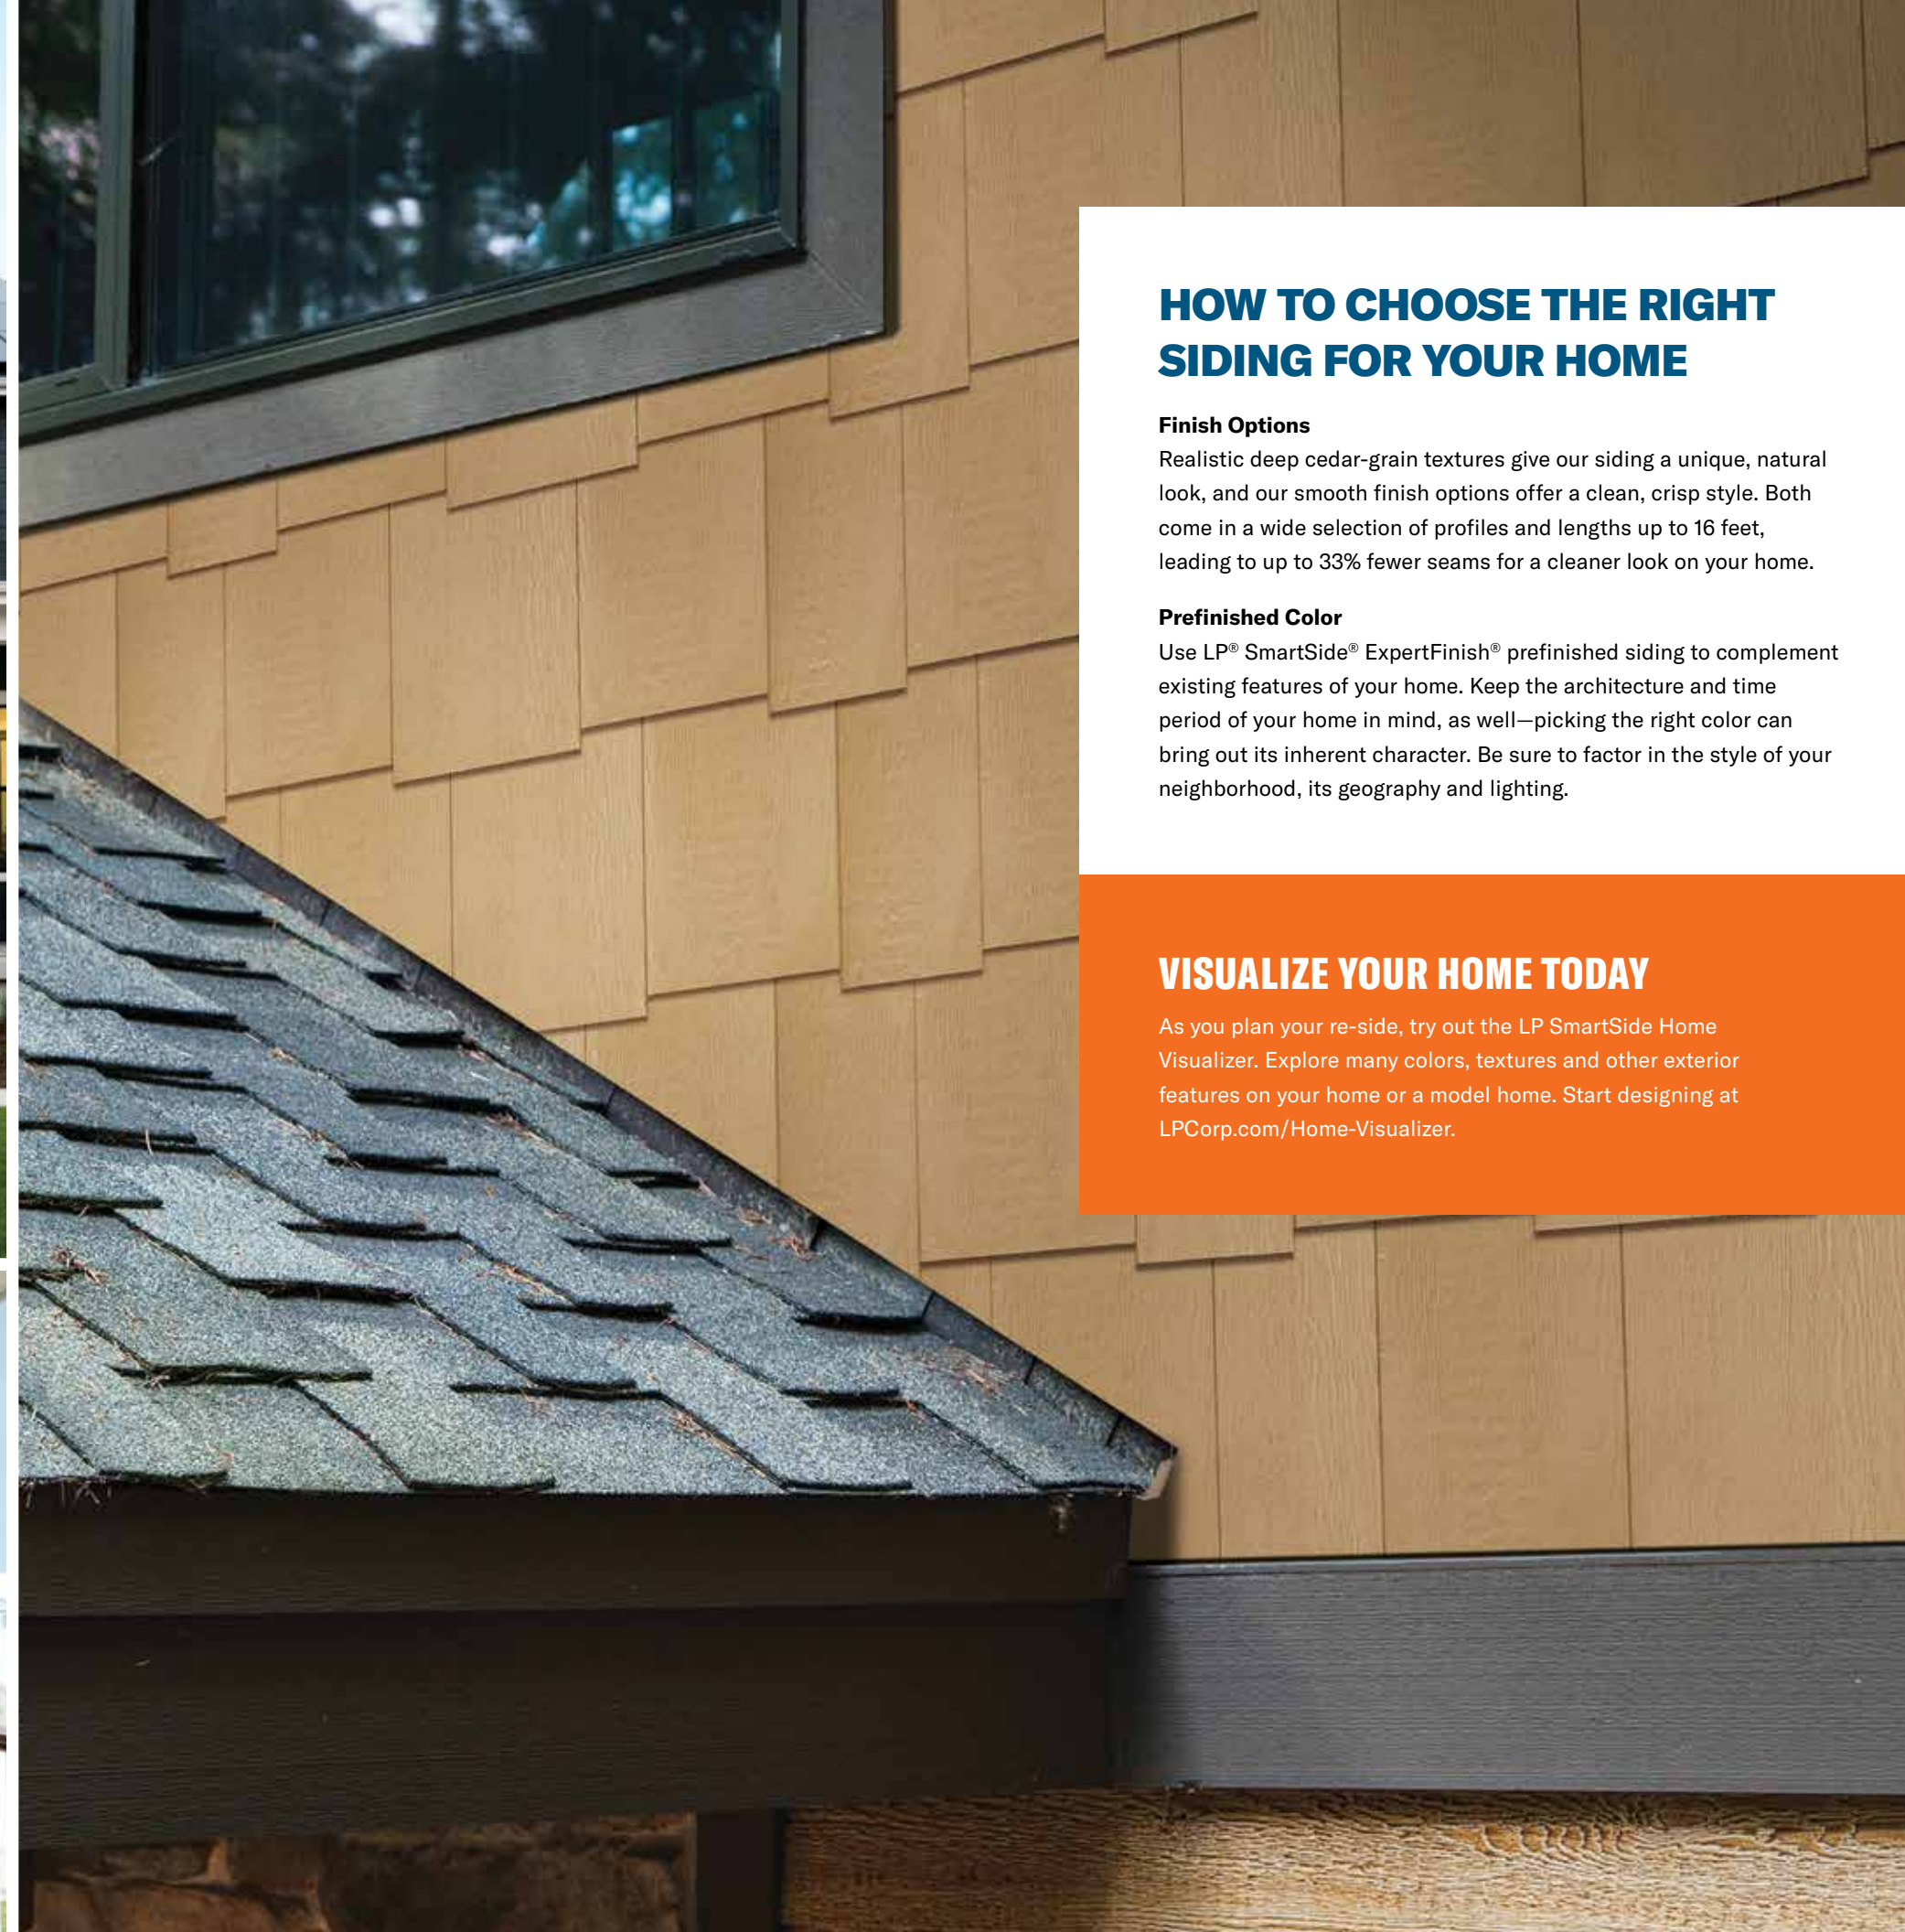

With cedar-grain texture and smooth finish options, LP SmartSide Trim & Siding stands apart from all other choices as an easy way to bring out your home's unique charm with ageless beauty that is engineered to perform.

BUILT TO LAST

You experience some of your best moments and memories at your home—so it's important to keep it looking beautiful.

LP® SmartSide® treated engineered wood siding is designed to hold up to harsh weather and provide a home with superior resistance to impact damage from everyday bumps and bruises to golf ball-sized hail.

HOW TO CHOOSE THE RIGHT SIDING FOR YOUR HOME

Finish Options

Realistic deep cedar-grain textures give our siding a unique, natural look, and our smooth finish options offer a clean, crisp style. Both come in a wide selection of profiles and lengths up to 16 feet, leading to up to 33% fewer seams for a cleaner look on your home.

Prefinished Color

Use LP® SmartSide® ExpertFinish® prefinished siding to complement existing features of your home. Keep the architecture and time period of your home in mind, as well—picking the right color can bring out its inherent character. Be sure to factor in the style of your neighborhood, its geography and lighting.

VISUALIZE YOUR HOME TODAY

As you plan your re-side, try out the LP SmartSide Home Visualizer. Explore many colors, textures and other exterior features on your home or a model home. Start designing at [LPCorp.com/Home-Visualizer](https://www.lpcorp.com/Home-Visualizer).

THE BENEFITS OF PREFINISHED SIDING

The advanced durability you expect from LP® SmartSide® Trim & Siding now comes in colors that pop to make your home stand out and give it a polished look that will last.

- Durable siding available in 16 prefinished colors to provide a stylish, polished update to your home
- ExpertFinish® Lap helps limit the appearance of seams for a clean look
- Backed by an industry-leading 5/15/50-year limited warranty
- May offer installers and builders time and labor savings

CHOOSE YOUR COLORS

The LP® SmartSide® ExpertFinish® Trim & Siding color collection includes 16 versatile prefinished colors, all designed to look great and remain durable thanks to an acrylic latex factory-finished paint. From crisp Snowscape White to daring Abyss Black and many colors in between, you can bring any design vision or style to life.

Our 16 ExpertFinish colors offer on-trend, versatile design options ideal for many home styles, regions and more while ensuring your home stands up to whatever life throws its way for years to come. Looking for a custom color? LP SmartSide products also come pre-primed so you can paint them any color you choose.

Snowscape White

Shoreline Cream

Sand Dunes

Desert Stone

Quarry Gray

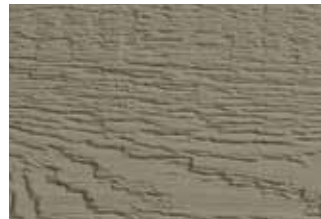

Prairie Clay

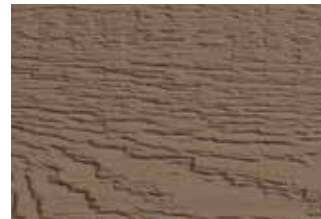

Marshland Moss

Terra Brown

Timberland Suede

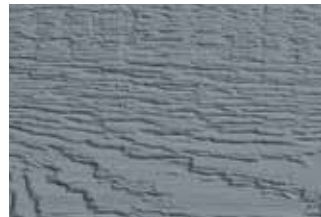

Canyon Brown

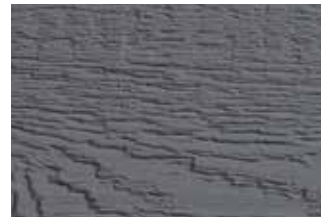

Redwood Red

Tundra Gray

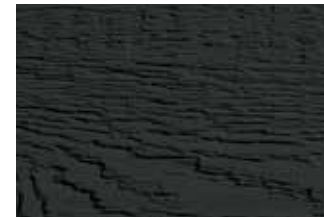

Summit Blue

Cavern Steel

Rapids Blue

Abyss Black

WHAT TO EXPECT WHEN RE-SIDING

On average, re-siding your home takes 7 to 14 days and can be done virtually any time of the year. When you install LP® SmartSide® ExpertFinish® prefinished siding, you'll see time savings. If your new siding is installed pre-primed, the painting and finishing process typically takes an additional 2 to 4 days as long as your contractor follows the paint manufacturer's instructions.

If you are in need of a contractor, please visit [LPCorp.com/Request-A-Quote](https://www.lpcorp.com/Request-A-Quote) to request a quote from a reputable contractor in our LP® SmartSide® Preferred Contractor program.

ADVANCED DURABILITY FOR LONGER LASTING BEAUTY®

Every LP® SmartSide® product is treated to the core with our proprietary SmartGuard® manufacturing process. With four components of protection, the SmartGuard process adds strength and helps LP SmartSide products withstand impacts, freeze-thaw cycles, high humidity, fungal decay and more.

Zinc Borate: This naturally derived additive helps engineered wood resist damage from termites and fungal decay.

Resins: Resins offer incredible strength to help LP SmartSide siding stand up to impact and survive freeze-thaw cycles.

Waxes: Designed to resist moisture, waxes coat each strand to offer enhanced durability in humid environments.

Overlay: This final element of protection resists moisture intrusion, providing a durable base for a finished look.

When your siding is made with the SmartGuard process, you'll have the peace of mind you need when it comes to your home's exterior. LP SmartSide products can stand up to up to 200 mph winds, golf ball-sized hail, extreme heat, fungal decay, termites and more. Make the right choice the first time with LP SmartSide Trim & Siding.

AN INVESTMENT WITH LASTING VALUE

LP® SmartSide® products are backed by industry-leading limited warranties that are 67% longer than the industry standard 30-year warranty. With LP SmartSide engineered wood siding, trim and more, you can re-side with confidence in the product to withstand weather, impact and the passage of time.

LP SMARTSIDE PROTECTS MORE

The LP SmartSide Trim & Siding limited warranty covers three main areas of potential damage—fungal decay, hail, and structural features like buckling—so you can have peace of mind and the look you desire for your home. Specifically, the limited warranty covers hail damage caused by hail up to 1.75 inches in diameter, fungal degradation, buckling, cracking, chipping, peeling and other rupturing of the resin-saturated surface.
